

## What do we offer?

We provide a bridge between regulatory requirements and business, helping industry to meet worldwide standards: IEC, MRP, TCO, EU DIRECTIVES, CSA, UL, OSHA, EPA, Consumer Product Safety Commission and other industry and government agencies. Since 1985 quality products and service have been the guidepost of our business.

Ergonomics, Inc. manufactures the most extensive line of Safety and Accessibility Probes; therefore, we offer a clear savings in direct sales to our customers.

We supply instruments, gauges and meters for product safety testing. Our products are backed by a technical staff that understands latest standards and can assist in determining test equipment needs or developing test procedures.

We specialize in making custom test apparatus and offer calibration and repair services on all types of product safety test equipment.

Regulatory compliance is our specialty. Contact us for consulting assistance in obtaining a CE mark or guidance through certification procedures.

**Personalized service for each of our customers is how we do business every day.**
