Jointed Children's Finger Probes -- Model JFP32

The Children's Finger Probes come in a set of two. One size is for simulation zero to thirty six month old children, Model JFP32A; the second size is for three to fourteen years old, Model JFP32B. These test fingers are to test for protection against access to hazardous parts with a human finger. The jointed finger tips are all made with high quality stainless steel. The handles are fabricated from durable Delrin material.
